## The sarahu corona virus diseases 2021 - Analyses and research accordingly planetary

**Sarahu Nagarazan**

### Abstract

COVID-19 is an a living virus it's also known as a species, it is very delicate than a waves, but it's not as speed as a wave, it's an a droplet of a waves.

COVID-19 has been generated on its own from Astronomical planets, this virus has been spreading to human beings from the planets like "Rahu north node and mars", and its leaving infection to other living animals and human beings, while we researched on these two planets (rahu north node and mars) its leaving its infection, allergy, health, digestion, war fights, illness, Kaal Sarp Dosh, depression, diabetes and etc; its pointing out and its creating apart from this in universe these are new types of infections due to these planets apart from mars due to rahu/north node but it's not born as artificial.

**Keywords:** Astrology and human science

### Introduction

#### Subjects

1. COVID-19 is not a natural virus as dengue and malaria its born on its own due to planets conjunction and rotation these are many others new types virus has been generated on its own, here are the experimental sectors.
2. In this period of planet direction allergy, infections will be seen as many kind of disease, a disease which has been born from planet conjunction or rotation there will be very less chances to get rid of these kind of viruses, but the virus which born on its own will be spreading very fast and it will be killing human beings.
3. When there is a composition between rahu north node and moon at that point of time human beings will that suffer more due to infection, Allergy, Perturbation, fear, terror and burning also at cause's digestion problems.
4. When there is a composition between mars and moon at this point of time there will be war, blood, pistol, psychological pressure and also chances of getting into fire accident and deaths may cause due to electricity efficiency.
5. We may have to face ghosts' Kaala sarpa dosh, accidents skin diseases and sputum accumulation when there is unite between Jupiter and rahu north node.

**"In this situation human beings will lose their strength to fight against the virus and the virus infections will start attack on human beings."**

1. We can avoid the infection by wearing masks but it can only prevent us by 10% in 100%.
2. If incase if there is any changes is the period of the planets rahu north node and mars if rahu north node and mars place changes in a rotation the virus infection level will automatically decreases and human beings with also be able fight against this virus.
3. Once we start calm down with an action of these planets everything will be normal for which human beings should take action before something happens, else we can stop all these infection with chemical methods.
4. For safer side we can also stop all these infections which causes through viruses with indictable drugs offered by government through medical authorities.
5. Dust is also known as a virus but we cannot call an inanimate once as a virus.

### "COVID-19 Experiment Research and Instances"

A self born virus can be cleaned in a computer very easily and also in a mobile phone. Why because they are self born viruses they are not from planets rays, but a virus which born from

the Panchabhats and from planets conjunction cannot be killed or cleaned that easily none of the disease destroyed permanently, only very few we might have heard.

1. There were 30 passengers traveling in a bus in which one person was infected by 'COVID-19' from these it has been spreaded to 3 more people within the bus and other 27 was not infected.
2. Two and half year baby was infected by 'COVID-19' but it didn't spreaded to mother father and others family members.
3. A passenger was infected by 'COVID-19' but none other than that person in that flight was infected by him in the flight. There were 10 members is a family in which 01 person was infected by 'COVID-19' but other 09 members was not infected.

#### **"There are two types of species which (or) without living virus"**

- Living (or) non living, a non living virus can spread infectious disease, in fact it's not a non living virus in reality. Even a mosquito is known as species it can spread infections to many, it can happen when we sneeze.

#### **Biological Research**

Acidic, carbon dioxide, Nitrogen, Hydrogenated all these are considering as living particles water, air, sky, earth and fire all these are living species. Any types of virus can generated by Panchabhats, rahu north node is been occupied by fire and air where it can spread infection to human being easily and it will be very fast in spreading poissness air, any virus which infected a human is called as living species.

Once it infects a person it will get more power to spread by 01 person to another. When a mosquito sat on any object its touch will be there on that object up to 5 to 30 minutes it may also be there permanently on that object. Same way a small insect will take a role play when it leaves its touch on an object one a man touches it, it occupies human beings body and it start leaves some kind of skin disease, allergy, and rashes on human body until it gets vanish and it will destroy automatically. When we believe sea shell is a leaving species insects are not a non living things. It is a species as per biological science.

When a person with low immunity power he will be easily attracted to all kind of infections, allergies and other new types of disease, like wise if there is a cut meat there is a belief that evil spirit if there is a cut meat the evil spirits will be present in it, in general a non vegetarian will be infected more by these kinds of viruses, though they are neat and clean.

Usually in cut meat virus will start living in it. 'COVID-19' is been generated by 'rahu north node planet' it started from china countries wet meat market and it has been melted in air and its infecting people around world in form of air.

Fluid content and atomic elements that means the most sweating parts in human body is hands and nose where it leaves more sweat the man starts touch molecules and those will start touch others, but COVID-19 is not occupies a man by a touch.

In generally a virus can spread in air. When we sneeze it starts leaves droplets in the air and it starts occupy one to one another. In general a virus can spread in air especially when we sneeze it starts leaves its droplets in air and it will easily occupy the human beaing one person to other. COVID-19 is also 'PANCHABHATAS' molecule and it start affect man and other living animals by its touch and it infects, like wise

COVID-19 is an 'PANCHABATAS' molecule and its leaving its impression throughout world. Its life span time will be one year after one year there will be changes in astronomical planets place change and COVID-19 will slowly controlled and after that it will be part of other diseases.

A new disease will infect at least a year and then it will get controlled by medicines.

New viruses can get in controlled within 1 and half year from its born time.

#### **Corona Virus Diseases – 19, 20 – Review and Revised 2020:**

**Project Revises 01:** COVID-19 is not a more spread contagious disease. In reality COVID-19 is self made disease and it is a common disease and normal virus. Whenever there is reduction of white blood cells in such a person or who have delicate health, also those who fall frequently ill it means whenever there is a decrease in the energy of person due to B.P, Sugar, Typhoid and allergies when will lose positive energy, and due to improper blood circulation, when the food is not digested then at that time depending upon atmospheric some kind of viruses emerge. But COVID-19 is not new Viruses or diseases. And there is no specialty in this. But 2019 and 2020 due to the atmospheric seasonal change climatic variations Covid as spread and taken birth.but it is only temporarily. It is like suns eclipse.

**Project Revises 02:** COVID-19 according to the planets attacks on human beings. Usually if in some bodies' horoscope Ketu Dasa, Rahu Dasa or Ketu Bhukti, Rahu Bhukti or conjunction of Rahu, Ketu with Mars will get the naturally infections and allergies. Let it be any type of infections or viruses for some such time that fellow will be kept in hospital. In such situation COVID-19 is one of them.

**Rahu – North lunar**

**Ketu – South Lunar**

#### **Conclusive In Accordingly Planetary**

Any disease is not happening due to some planet but combination of many planets and this happens due to zodiac change. Due to moons opposite affect this disease as spread. Because moon has control over sea and sea related products. For the disease from viruses Rahu Ketu planets are also to be considered and effect of Saturn and Mars on Mercury such situations are created. Sun is the lord for health and when sun is week there will be increase such type diseases. At present Sun has moved in Saturn's Zodiac Path orbit. This will continue in February and middle of March in Kumba Rashi. Like this Sun has become week because he has moved in the orbit of Saturn zodiac path. Because of the arrival of COVID-19 irrational situation symptoms of pneumonia or seen. Planet Mercury is the cause for all this. It is the Jupiter planet which is promoting and growing. Jupiter planet is also responsible for the spreading of COVID-19 diseases. This diseases are calculated from Gemini Rashi and from Cancer Zodiac problems related to lungs and related to water. Cancer and Gemini Rashi are suffering from themselves paining.

At present Rahu is crossing Gemini rashi and also Mars and Jupiter planets along with Ketu in Dhanu Rashi seen completely Gemini and Cancer. In such situation Gemini and Cnacer both are affected. Sugar patients and depression patients COVID-19 attacks fast and effects. For sugar patients mainly Jupiter and for depression patients mainly Moon are

responsible. These two planets decrease the immunity power of a man.
